To all Hutchins Residents,

Exciting news awaits you as you will have the opportunity to vote on the construction of an indoor recreation center with a library in November of 2024. This new facility aims to provide a space for residents of all ages to engage in physical activities, learn new skills, and enhance their literacy.

Studies have shown that access to recreation facilities can have numerous benefits for individuals and communities. Regular physical activity has been linked to improved physical and mental health, reduced stress levels, and increased overall well-being. By providing a space for residents to participate in a variety of activities such as sports, fitness classes, and leisurely pursuits, the indoor recreation center can help promote an active and healthy lifestyle among citizens.

Additionally, the inclusion of a library within the facility will offer residents the opportunity to access a wide range of reading materials, educational resources, and programming to support literacy and lifelong learning. Research has shown that regular reading can improve cognitive function, enhance vocabulary and communication skills, and boost academic achievement. By incorporating a library into the recreation center, residents can further enrich their minds and expand their knowledge.

The construction of this indoor recreation center with a library is a significant investment in the well-being and development of the Hutchins community. We encourage all residents to participate in the upcoming vote and make your voices heard in shaping the future of our city.

Stay tuned for more information on the upcoming vote and the potential benefits of this exciting new facility.

Together, we can create a vibrant and thriving place for all to enjoy.

Sincerely,

Community Services & Park Programs
