

Welcome to the Hutchins Fire Department!

The Hutchins Fire Department is about more than just putting out fires. We also offer services in Emergency Medical Services, rescue, fire prevention, public education, fire investigation, hazardous materials response, wildland response, and pre-fire mitigation services. Our department is also charged with emergency management oversight and duties.

The Fire Department strives to keep pace with emerging programs and methods, ensuring that we provide the best possible service to our citizens, business owners, and visitors. We believe by working in partnership with other city departments, such as the Police Department, Parks and Recreation, and Public Works, we help create a community where residents and visitors can work, play, and live in a safe environment.

Our Vision Statement is simple: "We continually strive for excellence, guided by principles of trust, integrity, honesty, loyalty, safety, and respect for all."

In addition to fire duties, the Fire Department also provides emergency medical services to parts of the surrounding Dallas County areas. All shift personnel are trained as Paramedics and/or EMTs, and our ambulances are equipped with state-of-the-art medical equipment.

When you see one of us in the community, feel free to say "*hello*"! We would love to visit with you! You can also stop by the station for a tour and a more in-depth look at the fire station and the officers that serve you!
